Our hero of tomorrow...

... is your partner for the future!

DiaCut EMM - Series

- **DiaCut EMM 2500**
- **DiaCut EMM 4300**
- **DiaCut EMM 9000**

Advantages

- Your product for all punch, bent and deep-drawn parts
- Suitable for minimum quantity lubrication
- Suitable for deep drawing
- Highest performance in the stamping/bending process
- Suitable for all metals, non-ferrous metals and special metals
- PER compatible
- No pictograms or classifications (not classified according to CLP)
- Toxicologically harmless
- Very good skin compatibility
- Easily biodegradable (OECD 301B passed)
- Generally hazardous to water (formerly comparable to WGK0)
- One product for all applications

Increased productivity through biodegradable punching oils.

With this product range you get the perfect symbiosis between performance, human and nature! Due to the great responsibility and safety towards human and nature in companies and the related regulations and limitations for additives such as chlorine, sulfur and other performance enhancers, we felt obliged to increase the performance of your processes and to do justice to the environment.

With this range of products, we have managed to combine both sides without compromise.
